FOR OUR BETA USERS ONLY · DAY 1 LAUNCH DROP

20 prompts. *Built for you first.*

Real, tested, production-grade prompts pulled from our internal vault. Cinematic, editorial, product, motion, avatar. Ship-ready inside Videfy. Public version drops in a few weeks — you get them now.

How to use: drop any prompt into Videfy's Generate tier or Avenue 1 (Claude MCP) chat. Swap bracketed [variables] with your subject / brand / scene. Engine recommendation in the corner of each card. Hit "regenerate" liberally — first output is rarely the keeper.

SECTION 01 · CINEMATIC

01 Editorial product hero · burnt orange studio

CHATGPT · IMAGE

```
Premium minimalist studio product photograph featuring [your product] as the hero subject, placed slightly left of center in a seamless burnt-orange matte studio environment with matching floor and backdrop. 85mm portrait lens look, shallow depth of field (ƒ/2.8), sharp focus on the product, softly blurred edges. Single soft key light from upper left, gentle fill from right, no harsh shadows. Real photo aesthetic — film grain, slight imperfection, color science of a Sony Venice. 4:5 aspect.
```

Tip: swap "burnt-orange" for any single Pantone-grade color to match brand

02 Wide cinematic establishing · golden hour

VEO 3 · VIDEO

```
Wide cinematic establishing shot of [location/scene], golden hour, low sun raking across the frame from camera left. Slow dolly-in toward main subject. Anamorphic 2.39:1, Kodak Portra 400 grain, real shadows, atmospheric haze. No motion blur on subject — clean focus. 8 seconds.
```

Pair with NB2 first frame to lock the look before animating

03 Editorial close-up portrait · directional light

NANOBANANA 2

```
Tight close-up portrait of [subject], face fills 70% of frame, directional Rembrandt lighting from upper-right, deep falloff to shadow on left half of face. Sharp focus on the eyes, freckles and pore detail visible, no skin smoothing. Editorial fashion magazine aesthetic. Background single deep matte color (forest green, oxblood, or charcoal). 4:5.
```

Generates much sharper than default — leans into pore detail for "real" feel

04 Subject + product hero · lifestyle integration

CHATGPT · IMAGE

```
Cinematic mid-shot of [subject demographic] holding [product] naturally, looking off-camera. Real environment ([cafe / studio / kitchen / street]). Diffused natural daylight from a window left of frame. Subject in focus, environment softly blurred (f/1.8 portrait look). Real-photo grain, slight color cast (warm amber or cool teal), shot-on-film aesthetic. 9:16 for vertical.
```

Swap demographic + environment to fit any brand niche

SECTION 02 · EDITORIAL + BRAND

05 4-quadrant brand grid · fashion editorial

CHATGPT · IMAGE

```
Single 4:5 image divided into 4 equal quadrants. Each quadrant: a different but tonally connected scene featuring [brand subject] — one product close-up, one model in motion, one environmental detail, one tight texture/material. Same color palette across all four. Magazine spread aesthetic. Shot-on-film grain. Subtle white inner gutter between quadrants.
```

Best for IG carousel cover or hero post that summarizes a campaign

06 Wood-panel framed photo + huge sans typography

CHATGPT · IMAGE

```
Vertical 4:5 composition. Background: warm wood paneling, slight grain. Center: square white-bordered photo frame containing a 1970s-style portrait of [subject]. Below the photo: large white sans-serif headline reading "[YOUR HEADLINE]" in 200pt+ weight. Bottom: small dark pill button with text "[CTA] →". Editorial poster aesthetic. Shot-on-film paper feel.
```

Adriana Bubori-style editorial. Works for Claude / agency / workflow content

07 Versus split poster · two faces in profile

CHATGPT · IMAGE

```
Vertical poster, 4:5. Two faces in profile facing each other, mirror-image composition, both lit cinematically against deep blue/black void. Between them: large white sans headline "[OPTION A] VS [OPTION B]" in poster typography, top half white / bottom half blue accent. Bottom: small chevron + "swipe for the comparison" microtype.
```

Highest-engagement format for tool comparison posts

08 Massive type over photo · single thesis statement

CHATGPT · IMAGE

```
Full-bleed vertical 4:5 photo of [subject in environment]. Across the middle of frame: massive white sans-serif headline "[YOUR THESIS]" — 280pt+, no shadow, full opacity, slight vertical compression for stacked feel. Photo: real, grainy, anti-AI-look. No other text.
```

core.aivision style. Works for declarative / manifesto posts

SECTION 03 · AVATAR + UGC

09 Founder talking-head · natural office setting

AVATAR · VEO 3

```
Natural founder-style talking-head of [character], sitting at desk in warm-toned office, looking directly at camera, speaking conversationally. Hands occasionally gesture in frame. Soft window light from left. 50mm look, shallow depth of field. Subtle camera shake (handheld feel). 8-second loop, lip-synced to script.
```

Drop your script into Avenue 3 Avatar — generates without needing live shoot

10 UGC selfie aesthetic · iPhone-style

NANOBANANA 2

```
Selfie-angle shot of [subject], iPhone front-camera aesthetic, shot in natural light at [location]. Subject framed slightly off-center, holding phone visible at lower edge of frame. Real-photo color cast — slightly warm, mild lens distortion at edges. Clear motivational expression / casual confidence.
```

Anti-polished. Use for "real founder behind the brand" content

11 POV shot · over-shoulder workspace

VEO 3 · VIDEO

```
POV shot from over the shoulder of [character] working at [setup]. Camera shows the screen / workspace with [activity] in clear focus. Slow zoom-in toward main task. 50mm. Natural ambient room lighting. 6-8 seconds.
```

Best for showing actual product use, screen recording style

SECTION 04 · MOTION + ANIMATION

12 Subject parallax · static camera, moving subject

VEO 3

```
Static locked camera. [Subject] enters frame from left, walks across center, exits right. Slow steady pace, no camera move. Background depth-of-field separation. Real-world physics — natural gait, hair movement, fabric drift. Cinematic light direction unchanged. 8 seconds.
```

Lock the camera, let subject motion carry the clip — cleaner than dolly moves

13 Liquid pour close-up · slow motion

VEO 3 / KLING

```
Macro close-up of [liquid] being poured slowly into [vessel]. 200fps slow-motion feel. Side light reveals translucency, surface tension, micro-bubbles. Background out of focus, single color. 6 seconds. No motion blur on liquid surface.
```

Works for any beverage / product reveal / texture moment

14 Object reveal · slow rotation on plinth

VEO 3

```
[Product] sitting on dark plinth in deep matte studio. Camera does slow 90-degree dolly arc around the object, maintaining eye-level angle. Single soft key light from upper-left, deep shadows untouched. Background 100% black. 8-second clip.
```

High-end product reveal that costs thousands in real production

SECTION 05 · CONCEPT + STORY

15 Storyboard-from-brief · 4 scenes

AVENUE 1 · CLAUDE MCP

```
Take this brief: "[paste 1-2 sentence ad concept]". Build a 4-scene storyboard for a 30-second [vertical / horizontal] piece. Scene 1: hook (3 sec). Scene 2: tension (8 sec). Scene 3: reveal/payoff (12 sec). Scene 4: CTA (7 sec). For each scene: shot type, action, voiceover line, on-screen text. Then generate first-frame images for each.
```

The Claude MCP killer demo — brief in, finished storyboard out

16 Variant generation · 3 hooks from one concept

AVENUE 1 · CLAUDE MCP

```
From this campaign concept: "[paste concept]". Generate 3 distinct opening hooks (first 1.5 seconds): one POV/personal, one cost reframe, one bold thesis. For each hook: 1 line of dialogue, 1 visual description, 1 reason it lands. Generate first frame for each.
```

Test 3 directions before committing to a full edit

17 Brand-locked image set · 6-shot campaign

CHATGPT · IMAGE

```
Generate 6 images for a single brand campaign for [brand name]. Lock palette: [3 colors]. Lock typography reference: [serif / sans / mixed]. Lock lighting: [natural / studio / neon / etc.]. Vary the 6 shots across these roles: hero subject, environmental, product close-up, lifestyle in-use, texture detail, group/community moment. All must feel like one campaign.
```

Ensures cohesive brand feel across an entire post set

SECTION 06 · PRACTICAL WORKFLOWS

18 Reference + style transfer

NANOBANANA 2 · IMAGE EDIT

```
[Upload reference image]. Apply this style to [new subject / scene]: same lighting, same color palette, same lens look, same framing principles. Replace the subject with [new subject]. Keep the original photographic feel — no AI gloss.
```

Best way to maintain visual consistency across content drops

19 Avatar lip-sync · script to video

AVENUE 3 · AVATAR

```
Generate Avatar talking-head for this script: "[paste script under 60 sec]". Use [character preset].
Setting: [office / studio / outdoor]. Tone: [casual / professional / energetic]. Output 9:16
vertical. Auto-generate captions in [brand color] at bottom third.
```

Replace shoot day with a 60-sec generation

20 Full ad in one chat · brief to render

AVENUE 1 · CLAUDE MCP

```
Build a 30-second [product launch / awareness / conversion] ad for [brand]. Audience: [target]. Tone:
[direction]. Aspect: 9:16. Run the full pipeline: brief lock → storyboard → image gen for each frame
→ animate to video → voiceover → subtitles → export-ready render. Surface decision points before
committing to full render.
```

Whole campaign, single chat, finished output. The killer demo.

THANK YOU FOR BEING EARLY

Now go make something *weird and good.*

These 20 are a starting line, not a finish line. The first output is rarely the keeper — but the second or third often is. Iterate. Regenerate. Mix engines. Make it yours.

BETA-ONLY

Public version drops in a few weeks. **Don't share publicly** — this pack is our thank-you for being early.

BUILT ONE THAT CRUSHES?

Drop it in our **Discord**. We feature the best community prompts in the next pack.

STUCK?

Founder office hours · **Wednesday 2 PM ET** live in Discord. Bring the broken thing.
